Factors Influencing Costs

1. Current Quality System Maturity:

- **No Existing Quality System:** Higher costs due to the need for extensive training and documentation development.
- **ISO 9001 Certified:** Lower costs as many systems and processes are already in place.
- **Partial Quality System:** Costs vary depending on the gaps and areas needing development.

2. Internal Resources:

- Availability of experienced quality personnel can reduce the need for external consultants.
- Existing documentation and procedures that meet AS9100 requirements can lower documentation development costs.

3. Company Size and Complexity:

- Larger and more complex organizations typically require more extensive consulting and auditing services.
- Number of sites or locations can also affect audit and travel costs.
